

# EXPERIENCE --- **TRUE NORTH**

What you've heard about the north ...  
it's all true.

# LOSE YOURSELF IN THE SCENERY

Have you ever felt completely in sync with nature, to the point where you lost your sense of self and, just for a moment, became one with your surroundings?

The grandness of our northern scenery will do that to you. It will inevitably make you feel small, but you won't mind. Small is not the same as insignificant. You're practically alone up here, which makes you the most important person for miles and miles.

# FIND YOURSELF IN THE PROCESS

As you discover new, exotic places in the wild polar regions of Norway, you'll inevitably discover a thing or two about yourself as well.

The intense visual impressions surrounding you, ironically makes this wilderness an ideal place for introspection. And you don't have to force it either. Out in the grand northern nature, the big thoughts come naturally.

# HIGH ABOVE SEA LEVEL

The steep mountains rising from the ocean at seemingly impossible angles are astonishing to look up at, but perhaps even more beautiful to look down from.

We'll make sure you get the chance elevate your experience by hiking high above the North Sea, as close to our famous northern light as you can get without flying.

# AND DEEP BELOW

Mountains are not the only good things to come up from the North Sea. Fishing is both livelihood and recreation up here. Routine and passion. Some even say you haven't tasted real fish until you've had a fresh arctic specimen on your plate.

We'll let you experience and taste the arctic waters in all their glory – a thrilling and filling all you can catch mystery buffet.

# MIDNIGHT SUN

When on holiday in a place where the sun never sets, you decide what is day and what is night.

Light up your summer by spending it with us in northern Norway. It's a bright idea, and an unforgettable experience.

# NORTHERN LIGHT

The famous green lights dancing on a blanket of stars is probably one of the most photographed natural phenomena in the world, but to look up and see it with your own eyes is another thing entirely.

We highly recommend treating yourself by visiting us this winter, and seeing it for yourself.

«BRING A CAMERA.  
CHANCES ARE YOU WON'T  
BELIEVE YOUR OWN EYES.»
